Project Title:

AUTOMATIC TEXT SUMMARIZATION USING A TRANSFORMER-BASED T5 MODEL – AN INTELLIGENT, TRACEABLE PDF LEARNING PLATFORM

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: (here you write what you did in this project (contribution) including Model Description)

Automatic Text Summarization Using a Transformer-Based T5 Model – An Intelligent, Traceable PDF Learning Platform is an AI-based application that automatically extracts text from PDF documents and generates concise, meaningful summaries using the T5 Transformer model. The system helps users quickly understand lengthy study materials, research papers, and other documents without reading the entire content. It provides an easy-to-use platform for uploading PDFs, processing their content, and viewing the generated summaries, while also maintaining traceability to the original document for better understanding and reliable learning.
